Expert Recommendations and Advice

Jenmon team of engineers and technicians have many years of experience in the crane industry and are knowledgeable in all brands of cranes and related products. This team of veterans are able to provide practical solutions to our customers at all phases of crane maintenance and repair, ensuring an operative crane on site at all time.

Automated Tracking of Visual Inspection and Load Testing Dates

We have put in place an automated tracking of inspection and testing dates so that our customers can concentrate on their businesses, leaving the operations of their cranes to our care.

Servicing Cranes of All Made

Our trained technicians are constantly updated with product informations in the industry. The team is also well-versed in the parts and components of cranes of other brands.

Contract Maintenance and Servicing

Regular maintenance checks identify small repair issues that can be corrected before they cause failures of much more expensive components. The regular checks can also help extend equipment life span, and importantly, reduce physical injury and property damage due to equipment failures.

Carrying Out Load Testing with PE Submission

We have efficiently perform certified load test that is required before the cranes and hoists can be operated. Our professional engineers will also advise you of any deficient conditions found during the course of evaluation.

Emergency Response

Our technical specialists are always ready to response immediately to y our call to diagnose and repair problems of cranes or components on site.

24/7 Stand-by Service

Jenmon provides 24/7 stand-by service for customers with operations that run non-stop throughout the year.

Motor Rewinding

At Jenmon, we handle all major repair services including electrical rewinding.

Providing Spare Parts of Other Brands

Jenmon Spare Parts Unit carries a wide range of spare parts of different brands. The range of spare parts includes telemecanique parts: mechanical, electrical or electronic parts such as inverters, PLC control, etc. Lifting equipment with certification and testing—rope and chain slings, mechanically spliced thimble, turnbuckles, shackles, latching hooks and chain blocks.
